Daimler signs technical facility management agreement with Essen-based service provider

page 1
06/13/2008

HOCHTIEF Facility Management is to assume responsibility with immediate effect for technical facility management in the production bays of the Mercedes-Benz Bremen plant. Daimler AG has just concluded a corresponding agreement with HOCHTIEF Facility Management GmbH.

The Mercedes-Benz plant in Bremen has an area of just under 1.4 million square meters. With a payroll of around 13,300, it is the biggest private enterprise employer in the region. Vehicles in the C and CLK class and the Roadster SL and SLK are manufactured in this plant. HOCHTIEF Facility Management will take over operation of the sophisticated building services for the plant and also be responsible for supplying the location with production media and energy. The Essen-based services provider will be on call 24 hours a day and has to ensure extremely short response times. HOCHTIEF Facility Management already operates parts of the Mercedes-Benz production facilities in Mettingen and Untertürkheim.
